DETAILED ACTION

Allowable Subject Matter

Claims 1 and 3-10 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art fails to teach or fairly suggest, in addition to the accompanying features of the claims, the following in italics:

An optical module, comprising: a substrate; an optical element that is fixedly secured to said substrate; and an optical transmission member that is coupled to said optical element and fixedly secured on said substrate, wherein said substrate is made of a substrate having a through hole between a secured portion of said optical element and a secured portion of said optical transmission member, and *said through hole is set to have a distance W in a direction in which the secured portion of said optical element is connected to the secured portion of said optical transmission member, which is wider than a width that allows parallel light rays having a plane shape, emitted from a laser micrometer, to pass, and a length L in a direction perpendicular to said width W is smaller than the width of said parallel light rays.*

Claims 3-10 are allowable by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
